AMENDMENTS TO THE CLAIMS

Docket No.: 3449-0274P

1. (Previously presented) A bi-directional remote controller comprising:

means for requesting a guidance on a data broadcasting;

means for receiving guidance information provided from an outside in response to the request; and

means for notifying the received guidance information,

wherein the guidance information is extracted from the data broadcasting and wherein the guidance information is used for a user to operate at least one function being included in the data broadcasting.

2. (Original) The bi-directional remote controller according to claim 1, wherein the requesting means is a guidance setting button key.

3. (Cancelled)

- 4. (Original) The bi-directional remote controller according to claim 1, wherein the guidance information indicates the location of a button key to be pushed.
- 5. (Original) The bi-directional remote controller according to claim 1, wherein the guidance information indicates the location of a button key allowed to be pushed.
- 6. (Original) The bi-directional remote controller according to claim 1, further comprising means for inputting a response instruction on the guidance information.
- 7. (Original) The bi-directional remote controller according to claim 6, wherein the inputting means is a button key provided on a portion notified by the notifying means.

2 EHC/lab

- 8. (Original) The bi-directional remote controller according to claim 6, wherein the inputting means is a plurality of button keys provided on a portion notified by the notifying means.
- 9. (Original) The bi-directional remote controller according to claim 1, wherein the notifying means is a display device.
- 10. (Original) The bi-directional remote controller according to claim 1, wherein the notifying means is provided at a predetermined portion of the inputting means.
 - 11. (Currently Amended) A data broadcasting guidance system comprising: means for extracting guidance information from a data broadcasting; means for requesting a guidance on the data broadcasting; and

means for notifying the extracted guidance information in response to the request from the requesting means,

wherein the guidance information is used for a user to operate at least one function being included in the data broadcasting, and

wherein the requesting means and the notifying means are provided at a remote controller, and the extracting means is provided at a data broadcasting display device remotely controllable by the remote controller.

- 12. (Original) The data broadcasting guidance system according to claim 11, further comprising means for displaying the extracted guidance information in response to the request from the requesting means.
- 13. (Original) The data broadcasting guidance system according to claim 11, further comprising means for receiving the extracted guidance information in response to the request from the requesting means.

Application No. 10/667,610 Amendment dated August 2, 2007 After Final Office Action of May 2, 2007

14. (Original) The data broadcasting guidance system according to claim 11, further

Docket No.: 3449-0274P

comprising means for inputting a response instruction on the guidance information provided

through the notifying means.

15. (Previously presented) The data broadcasting guidance system according to claim 14,

wherein the inputting means is a button key provided on a portion notified by the notifying

means.

16. (Previously presented) The data broadcasting guidance system according to claim 14,

wherein the inputting means is a plurality of button keys provided on a portion notified by the

notifying means.

17. (Original) The data broadcasting guidance system according to claim 11, wherein the

requesting means is a guidance setting button key.

18. (Previously presented) The data broadcasting guidance system according to claim 11,

wherein the guidance information indicates the location of a button key to be pushed or allowed

to be pushed..

19. (Cancelled)

20. (Original) The data broadcasting guidance system according to claim 11, wherein the

notifying means is a display device.

21. (Original) The data broadcasting guidance system according to claim 11, wherein the

notifying means is provided at a predetermined portion of the inputting means.

4 EHC/lab

Application No. 10/667,610 Amendment dated August 2, 2007 After Final Office Action of May 2, 2007

22. (Currently Amended) A method for guiding a data broadcasting, the method comprising:

- (a) extracting guidance information from the data broadcasting;
- (b) requesting a guidance on the data broadcasting; and
- (c) notifying the extracted guidance information in response to the request,

wherein the guidance information is used for a user to operate at least one function being included in the data broadcasting, and

wherein in the step (a), the guidance information is extracted by a data broadcasting display device while the data broadcasting is displayed on the data broadcasting display device; and in the step (c), the extracted guidance information is notified on a remote controller used to remotely control the data broadcasting display device.

- 23. (Original) The method according to claim 22, further comprising the step of (d) displaying the guidance information.
- 24. (Original) The method according to claim 22, further comprising the step of (e) receiving the guidance information.
 - 25. (Original) The method according to claim 22, further comprising the steps of:
 - (f) inputting a response instruction on the guidance information; and
 - (g) performing a navigation according to the inputted response instruction.
- 26. (Original) The method according to claim 22, wherein the request is performed by pushing a guidance setting button key.
- 27. (Previously presented) The method according to claim 22, wherein the guidance information indicates the location of a button key to be pushed or allowed to be pushed.
 - 28. (Cancelled)

Docket No.: 3449-0274P

Application No. 10/667,610 Amendment dated August 2, 2007 After Final Office Action of May 2, 2007

29 (Previously presented) The bi-directional remote controller according to claim 1, wherein the guidance information indicates at least one of input parts to be inputted in order for the user to input a command corresponding to at least one of the at least one function being included in the data broadcasting.

Docket No.: 3449-0274P

30. (Cancelled)
